

RESIFLOW ALL-IN-ONE HOT WATER HEAT PUMP

Elevate the Efficiency, Lower the Bills

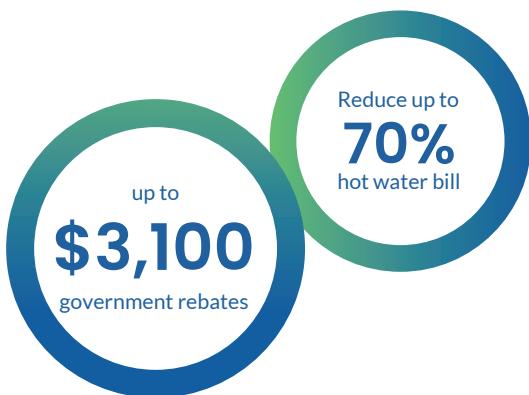

Government Rebate Ready

Take advantage of nation and state incentives by choosing our hot water heater.

Aura ResiFlow All-in-one hot water heat pumps have been registered for:

- STC (Federal Small-Scale Technology Certificate)
- VEEC (Victorian Energy Efficiency Certificate)
- ESC (NSW Energy Savings Schemes)
- Victorian Solar Hot Water Rebate

As a Victorian householder, you could receive a hot water rebate if:

- you are the owner-occupier of an existing property where the system is to be installed
- the household taxable income of all owners combined is less than \$210,000 per year
- the value of the property is under \$3 million
- the property address has not already received a hot water or a solar battery rebate under the Solar Homes Program
- the hot water system to be replaced is at least 3 years old from the date of purchase
- you received a Solar Homes rebate and/or loan but have moved house. You can apply for another incentive at your new address as an owner-occupier if the property has not received these rebates before.

Why Heat Pump and How it Works?

Australia is transitioning from fossil fuels to renewable electricity. Instead of burning natural gas, electric hot water heat pumps utilise a refrigeration cycle to transfer heat from the air to water. This technology is **70% more efficient** than electric resistance-type heaters and significantly cheaper and cleaner than traditional gas-fired water heaters.

Technical Data

Model	HWC200BX	HWC270BX
Water Tank Volume (L)	200 L	270 L
Suitable For	1-3 People	3-5 People
